60 Total Stitches

You'll find every stitch you need, from basic quilting to advanced home decor. The large stitch menu on the front of the machine is arranged by essential stitches, hemming stitches, decorative stitches, even heirloom stitches. Plus you get six automatic buttonhole stitches for perfect size and placement every time.

Innovative LCD Screen with Fast Navigation

Handy Arrow Keys take you quickly to your stitch choice and setting options. The large, day glow LCD display makes your stitch number, width and length, and foot recommendation easy to read at a glance. Spend less time scrolling and more time sewing.

Start/Stop Button Let's You Relax On Those Long Seams

Located close to the needle so you don't have to move your hands, the Start/Stop button lets you relax your pedal foot. At the beginning of a seam, simply press and hold to slowly accelerate up to your set speed. At the end, press and hold to slow down and release to stop – a Janome exclusive.

One-Hand Needle Threader

Pull down lever stays down for effortless threading every time.

Needle Plate

Our unique needle plate gives you easy measuring. An extra wide needle plate contains important markings for increased accuracy giving you more seam allowance options.

Adjustable Foot Pressure

Just turn the dial to adjust the pressure foot to one of six pressure levels. A great feature to fine tune for fabric weight.
